

Blast off. Crank hard. Immerse yourself in the panorama. Daydream en route. Renounce the windshield. Feel the terrain. Punish your quads. Sweat like you mean it. Carve monster turns. Stop for strawberry ice cream. **GRAB SOME FREEDOM** Meditate on the sky's blueness. Skip the pump. Become a neighborhood icon. Wear a strange hat. See how slow you can go. Pedal to exhaustion. Ride into a smoldering sunset. Add an epic new chapter to your life story. Rest a spell. Repeat endlessly.

NOVARA®

07

Adam rocks the Hurricane Jersey
and Rail Double Shorts.

We think the history books should call out 1983 as one of those seminal years. You know, like 1776. Because it was in '83 that we rolled out our original batch of bikes, including the classic Outback pictured here. Finally, the Novara ideal had been forged into steel. Our philosophy? We believe that you have certain inalienable rights, among them: the right to travel without a combustion engine, the right to ride an ultra-comfortable bike, and the right to wear a big ol' grin the whole dang time. We held those truths to be self-evident a quarter-century ago. And we still do today. We pledge on our honor and on the Novara logos inked over our hearts that we'll stick by them 'til the end.

NOVARA

Stephanie (left) hauls in the Shift Sleeveless Jersey and Trionfo Shorts. Mindy's sporting the Flirt Sleeveless Jersey and Mezzo Shorts.

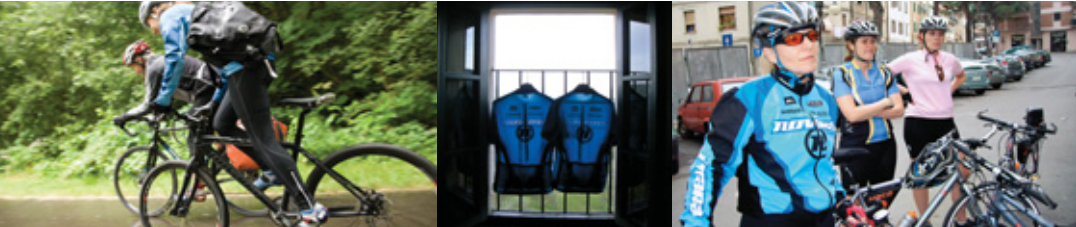

Our designs start with sensations. Like the stomach-tickle that accompanies a mad downhill run. Or the rush of joy that arises as one swoops through an asphalt curve. We hit “pause” on the feelings, and *then* our design begins. We build bikes to fit those freeze-framed moments, one component at a time. We lavish on the tech, not just for tech’s sake but for the good of the ride. We anguish over colors and graphics like wrench-turning Van Goghs. When it’s all good, we hit “play.” And that’s where you come in: beaming a megawatt smile, yelling “yeehaw!” and just plain enjoying the ride.

Nikole, Novara's lead women's gear designer, helps make sure our bikes pass the comfort test. She's wearing the Shift Jersey, Flip Double Shorts and Women's Full-Finger Lifeline Gloves.

Novara only christens women's bikes after they pass a crucial rite of passage. They must get the thumbs-up from our posse of hard-riding female field testers here at Novara World Headquarters. And boy, do those gals love to hammer our prototypes—helping the designers make sure geometry, components and fit are totally dialed for the feminine physique. None of us here could be happier with our '07 lineup of women's bikes. Particularly the women, who have been out riding them pretty much nonstop since they arrived at the shop. Looks like the guys get to mop up all the smashed champagne bottles out back.

Go, go, go

Time to hammer, y'all. Asphalt is your friend. Especially when there's a Novara road bike between you and it. We build these puppies with the emphasis on lightness and super-duper speediness. Because you're not having fun until you're picking bugs from your grill. Mmmmm, that's the stuff. Come and get it.

Why roll with three front rings when two will do?

In '07, Trionfo sports an FSA compact crankset.

It saves the weight of a ring and still offers a full range of climbing gears to sync with any cadence.

TEAM TRIONFO

Our thoroughbred racer. You gotta respect the specs. Columbus Muscle carbon fork. Mavic Ksyrium SSC wheels. Shimano Dura-Ace titanium components. It keeps going, and yeah, everything's insane.

Frame: Triple-buttet AN6 aluminum with Columbus Muscle carbon seatstays **Fork:** Columbus Muscle carbon **Crankset:** FSA K-Force carbon 53/39 **Drivetrain:** Shimano Dura-Ace 10-speed **Highlights:** Columbus Muscle carbon rear triangle, Mavic Ksyrium SSC SL wheels, FSA K-Force carbon seatpost.

TRIONFO

Predator of the open road. Every single piece of its anatomy is spec'd to kill, from the aggressive frame geometry, to the Columbus Carve carbon fork, all the way down to the Vittoria Diamante Pro tires.

Frame: Triple-buttet AN6 aluminum with Columbus Carve carbon seatstays **Fork:** Columbus Carve carbon **Crankset:** FSA Energy MegaExo compact 50/34 **Drivetrain:** Shimano Ultegra 10-speed **Highlights:** Vittoria Diamante Pro tires, Mavic Ksyrium Equipe wheels and Columbus Carve carbon seatstays.

STRADA

School some competition. Or just jump on and hammer for joy. Strada packs copious Columbus Tusk carbon on an ultralight and stiff AN6 aluminum backbone.

Frame: AN6 aluminum **Fork:** Columbus Tusk carbon with alloy steerer **Crankset:** FSA Gossamer MegaExo Triple 50/39/30 **Drivetrain:** Shimano 105 10-speed **Highlights:** Columbus Tusk carbon seatstays, FSA cockpit, Shimano R550 wheels.

All carbon is not created equal. That's why we love Columbus. It's the kind of aerospace-grade stuff that gives NASA engineers sweaty palms and rabid roadies a serious case of perma-grin.

Work it

Hills schmills. Jump on a Novara women's road bike and hit it. We've tailored these speed-lovin' machines just for women roadies. You'll dig the comfort factor. Even when your quads are abso-screaming-lutely on fire after that last kick-in-the-pants of a climb.

Our Carema bikes are 100% comfort-fitted for women. We've sculpted their frames and sweated details like saddles, bars and grips so they meld perfectly with the female form. For women roadies, that's a beautiful thing.

CAREMA

Has the same basic DNA as Carema Pro, offering the identical women-specific fit. Bejeweled with a Columbus Tusk carbon fork and lots more componentry bling. All for less than a grand.

Frame: U6 aluminum **Fork:** Columbus Tusk carbon
Crankset: FSA Omega MegaExo triple 50/39/30
Drivetrain: Shimano Tiagra 9-speed **Highlight:** Women-specific San Marco Ischia saddle.

USIX ALUMINUM SHIMANO RITCHEY

CAREMA PRO

Our seriously swanky women's road rocket. Upgraded in '07 with the way-comfy, handmade Fi'zi:k Vitesse Sport saddle and also Columbus Tusk carbon seatstays to match the fork.

Frame: AN6 aluminum **Fork:** Columbus Tusk carbon with alloy steerer **Crankset:** FSA Gossamer MegaExo Triple 50/39/30 **Drivetrain:** Shimano 105 10-speed **Highlights:** Columbus Tusk carbon seatstays, Shimano R550 wheels.

Pursue happiness

Rally on the rec path. Get in a workout. Patrol the neighborhood. Our pavement bikes put the emphasis on comfort, letting you cover ground without having to scrunch up your body like a Tour de France racer. It all stems from our belief that the secret to happiness is not letting anything cramp your style.

DIVANO

Take it for a mellow roll, or ride it in a multiday event. Divano's frame geometry is designed to be kind to your spine. Sweet specs for the price include a Columbus Tusk carbon fork.

Frame: U6 aluminum **Fork:** Columbus Tusk carbon with alloy steerer **Crankset:** FSA Omega MegaExo triple 50/39/30 **Drivetrain:** Shimano Tiagra 9-speed **Highlights:** Shimano R500 wheels, San Marco Ischia saddle, Ritchey cockpit.

U.S. SIX **SHIMANO** **RITCHEY** **Vittoria**

Welcome to the Pavement-Bike Zone, where comfort and performance meet the road. If you want a slightly relaxed road runner, a laid-back luxury cruiser or something in between, you'll find it here.

Stephanie gets playful in the Sleeveless Shift Jersey and Carema Road Skort. She reports that the skort works well for both casual and fitness-focused riding.

EXPRESS

Prowl the pavement in comfort. A relaxed frame geometry and flat bar let you watch the world blur by from a more-upright riding position. It's rack- and fender-friendly for the commuter set. Carbon fork smoothes vibration and adds style.

Frame: AN6 aluminum **Fork:** EVO carbon with alloy steerer for fenders **Crankset:** FSA Omega MegaExo triple 50/39/30 **Drivetrain:** Shimano 105 9-speed **Highlights:** Ritchey adjustable stem, Shimano R550 wheels, Vittoria Randonneur 700x28 puncture-resistant tires.

VELO.BIDDLES.COM

Our women's cruisers offer the same comfort features as Corsa and Metro, but their frames are all swoopy-retro. They're easy to get on and off and feature our patented Skirt-Compatible technology.

Jamie tames the trail with the help of the Shift Jersey, Flip Double Shorts and a Novara hydration pack.

Ride a singletrack rollercoaster

Flow like a living lahar over gnarled roots, ravenous ruts and rocks the size of cantaloupes. Rejoice in the random branch whippings. Mountain biking is where the knobby-tired creations of modern civilization run headlong into nature's warm embrace, or cold shoulder. Either way, it's one of the best ways we know of to escape the predictability of the everyday, strip-malled world. Check out our fleet of roughneck mountain rigs, and then go find what's waiting for you up in the hills.

A full-suspension system is a symphony of parts working together to absorb the thousands of rude shocks that a mountain bike is heir to. This in turn lets you ride longer and further without feeling like you've been body-slammed by Andre the Giant. In '07, we offer two full-suspension platforms: Harmony and TrueLink. They're each tailored for different conditions, but both offer balanced suspension forks and rear shocks, 4-bar linkages, cartridge bearings and optimized pivot locations for masterly control and a highly efficient ride. And they're all tuned up so you and the bike can make beautiful music together.

HARMONY 60

Gusseted downtube
Adds abuse-absorbing strength in critical points. Lets you go big without worry.

Adjustable travel
Tune the dial from 4.5 to 6 inches of travel and change Method's personality accordingly.

Oversized bearings
All pivot points have oversized sealed bearings for lateral stiffness and long life.

Harmony Suspension: For All-Trail Mayhem

The rugged soul of our all-trail Method bikes, Harmony is the lovable, huckable suspension platform. Offers 4.5" to 6" of adjustable travel. Sucks up big drops and withstands cringe-inducing punishment with aplomb. When it comes to lift-service-only trails, Harmony rocks the casbah. If you've got some singletrack in your sights, just dial down the travel.

true/link

Hydroformed tubing
6061 aluminum tubes make Float's frame unbelievably light, yet super-strong

Redesigned swingarm
Adds more lateral stiffness and optimizes shock stroke for smooth travel.

OPL pivot point
Optimized pivot location reduces both pedal- and brake-induced feedback for sheer riding silkiness.

TrueLink Suspension: For Cross-Country Cranking

This smooth-operating platform serves as the supremely supple spine of our Float 1.0 and 2.0 bikes. Gives you 4" of travel. Transforms a gnarly stretch of singletrack into a virtual magic-carpet ride. TrueLink's just as high on the quality meter as its beefier cousin, Harmony. It's just designed to perform on slightly less brutal terrain.

METHOD 2.0

Takes brutal hits and begs for more. Tank-tough frame includes an extra-fat downtube for huckable strength. Harmony suspension with 4.5" to 6" of adjustable travel goes from cross-country carousing to ludicrous speed descents.

Frame: AN6 Method **Fork:** RockShox Pike 454 with U-Turn **Rear Shock:** Pearl 3.1 with motion control **Crankset:** Truvativ Stylo TM 3.3 **Drivetrain:** SRAM X-9/X-0 **Highlights:** Avid Juicy 7 disc brakes with 7" rotors, Syncros Factory DS wheels, Harmony rear end with adjustable front and rear travel.

METHOD 1.0

Your all-access pass to nearly any terrain. Harmony suspension takes you from singletrack to lift-service-only trails. Not quite as cyclopathically aggressive as Method 2.0 but still a mad, mad ride.

Frame: AN6 Method **Fork:** Rock Shox Revelation 409 with U-Turn **Rear Shock:** RockShox Ario 2.2 with lock-out **Crankset:** Truvativ Fire-X 3.2 **Drivetrain:** SRAM X-9 27-speed **Highlights:** Avid BB7 disc brakes with 7" rotors, WTB Lazer Disc Trail wheels, Harmony rear end with adjustable front and rear travel.

All-trail access

Cross-country
cranking

Float 2.0 floats on Manitou's Relic Elite fork and Radium R rear shock. The fork's light and stiff thanks to 30mm aluminum uppers and next-gen reverse arch casting. Oil damping in both components lets you glide over nooks and crannies, smooth like butter.

FLOAT 2.0

Defy the tyranny of gravity. TrueLink suspension platform with 4 inches of travel and a halo of lightweight components make for nimble climbs and dreamlike descents.

Frame: 6061 FS aluminum **Fork:** Manitou Relic Elite **Rear Shock:** Manitou Radium R **Crankset:** Truvativ 5D 3.1
Drivetrain: SRAM X-7 27-speed **Highlights:** Hayes MX-4 disc brakes, Manitou suspension, Geax Saguaro tires.

true link

SRAM

MANITOU

FLOAT 1.0

Get the full-suspension experience without bottoming out your bank account. TrueLink suspension platform and the same hyper-efficient frame as Float 2.0 mean your satisfaction is guaranteed.

Frame: 6061 FS aluminum **Fork:** Manitou Axel Comp **Rear Shock:** Manitou Metel R **Crankset:** Truvativ ISO-Flow 3.0 **Drivetrain:** Shimano Alivio 24-speed **Highlights:** Tektro 10 disc brakes, WTB Speed V saddle, Manitou suspension.

true link

SHIMANO

MANITOU

PONDEROSA

A.K.A. "Pondo." Our hardtail hero breaks the spirit of even the most ornery trails. AN6 aluminum frame sports one of the sweetest component setups on either side of the Mississippi.

Frame: Double-buttressed AN6 aluminum **Fork:** RockShox Dart 2 with lock-out **Crankset:** Truvativ Firex 3.1, 2-piece system **Drivetrain:** Shimano Deore XT 27-speed **Highlights:** Avid BB5 disc brakes, Geax Saguaro tires, WTB Pure V saddle

Disc brakes give you stop-on-a-pebble precision even when rain's sloshing down like the sky has a clogged gutter. They adjust easily, and they don't lose power when your rim gets dinged all to heck. We love that action so much, we ponied up for disc brakes on every one of our mountain bikes.

Scott gets tricky in the XC Jersey and Rail Double Shorts.

BONANZA

Rowdy middle child of our hardtail mountain bike family. A hotshot attention-getter, for sure. Race it or just let it loose on your local trails. Upgraded with a 27-speed drivetrain for '07.

Frame: 6061 aluminum **Fork:** Manitou Axel Comp **Crankset:** Shimano M422 **Drivetrain:** Shimano Deore 27-speed **Highlights:** Tektro Aquila disc brakes, WTB SX-24 rims, WTB Weirwolf tires.

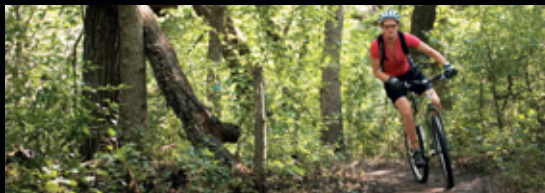

ASPEN

It may be our entry-level mountain bike, but it's capable of blowing more expensive wannabes right off the trail. Burly yet smooth-riding, just like a real mountain machine oughta be.

Frame: 6061 aluminum **Fork:** RST Gila T6 **Crankset:** Shimano Alivio **Drivetrain:** Shimano Alivio 24-speed **Highlights:** Tektro IO disc brakes, WTB SX-24 rims, WTB MutanoRaptor tires.

Why ride a single-speed bike? Because it's there. And it's a Zen-like challenge that'll improve your skills. Reason does away with a lot of the chain-clanging of the modern drivetrain, letting you focus your mind on the undulations of the terrain and the purity of the ride.

REASON

If you find the single-gear idea strangely compelling, here's your Reason. Light steel frame and high-end specs mean it's a real-deal trail bike. Just without all those pesky gears. Compatible with suspension forks in case you want to do a swap-out.

Frame: Reynolds 520 double-buttressed Chromoly **Fork:** Chromoly Straight Blade 80–100mm suspension correct **Crankset:** Truvativ Firex 1.1 33T **Drivetrain:** 3-speed (ride, run, walk) **Highlights:** Avid BB5 disc brakes, Syncros stem, bar and seatpost.

REYNOLDS SYNCROS GEAX

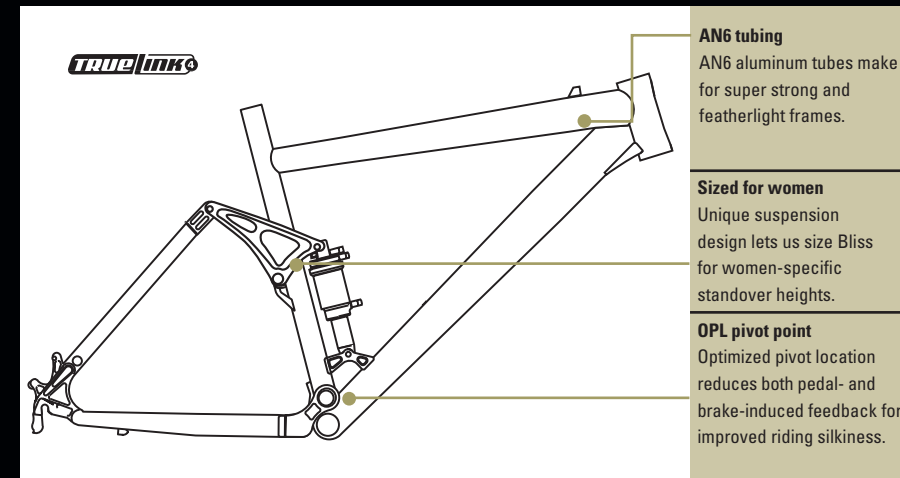

Who needs a day spa

When there's a mud bath waiting around the next bend in the trail? Mountain biking lets you fling yourself body and soul into the dirt-based natural world and come out glowing on the other side. And of course, the better the bike fits, the higher the euphoria meter can go. That's the mantra that guides the development of our women's mountain bikes. These are all real trail machines offering the same high-quality componentry and design details you'd find on our guys' mountain bikes—except they're totally, completely, obsessively dialed for women. If you're a mountain biking lioness, hop on. We'd love to hear you roar.

TrueLink Suspension for Women: We've taken the trail-tested four-bar platform from our Float bikes, tweaked it here and there and added two scoops of customized technology in order to arrive at a truly blissful women's riding experience. The lighter, female-friendly version of our TrueLink platform offers control, traction and plenty o' shock absorption. Go for epic all-day rides over the rough stuff. Tackle technical terrain with confidence. TrueLink reduces the trail's toll on your body, so when the riding's done for the day, you'll be psyched to saddle up and do it all over again tomorrow.

Blissful Comfort

Bliss, our premier full-suspension women's bike, offers a super-sweet ride that starts with the TrueLink platform and its 4" of bump-soaking travel. Diva springs in the Manitou fork suit a woman's bodyweight to a T. We placed the rear shock in line with the seatpost so the frame could be sized for unbelievably low standover heights, starting at 12". And of course, the geometry is all women-specific, all the time. C'mon, jump on. Let's get happy.

BLISS

Pièce de résistance of our women's mountain bike line. TrueLink full-suspension platform is lovingly crafted to fit the female form. Infinitely fine-tunable, like a knobby-tired Stradivarius.

Frame: Double-buttressed AN6 aluminum **Fork:** Manitou Axel Elite **Crankset:** Truvativ 5D 3.1 **Drivetrain:** SRAM X-7 27-speed
Highlights: Kenda Nevegal 26x1.95 Lite tires, Manitou Radium R rear shock, Hayes MX-4 disc brakes.

BONITA

Race-worthy components and performance at a surprisingly nice price. '07 upgrades include a smoother-shifting 27-speed drivetrain and lighter Manitou Axel fork. Giddyup.

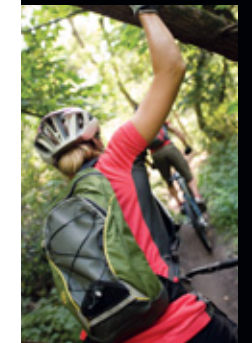

Frame: 6061 aluminum **Fork:** Manitou Axel Comp **Crankset:** Shimano M442 **Drivetrain:** Shimano Deore 27-speed
Highlights: Tektro Aquila disc brakes, WTB SX-24 rims, Kenda Nevegal 26x1.95 Lite tires.

PIEDRA

Enjoy the comfort of a women-specific mountain bike at an entry-level price. Piedra offers a female-friendly fit, and it's built to endure years of hard riding on rough terrain.

Frame: 6061 aluminum **Fork:** RST Gila T6 **Crankset:** Shimano Alivio 3.0 **Drivetrain:** Shimano Alivio 24-speed
Highlights: Tektro IO disc brakes, WTB SX-24 rims, WTB MutanoRaptor tires.

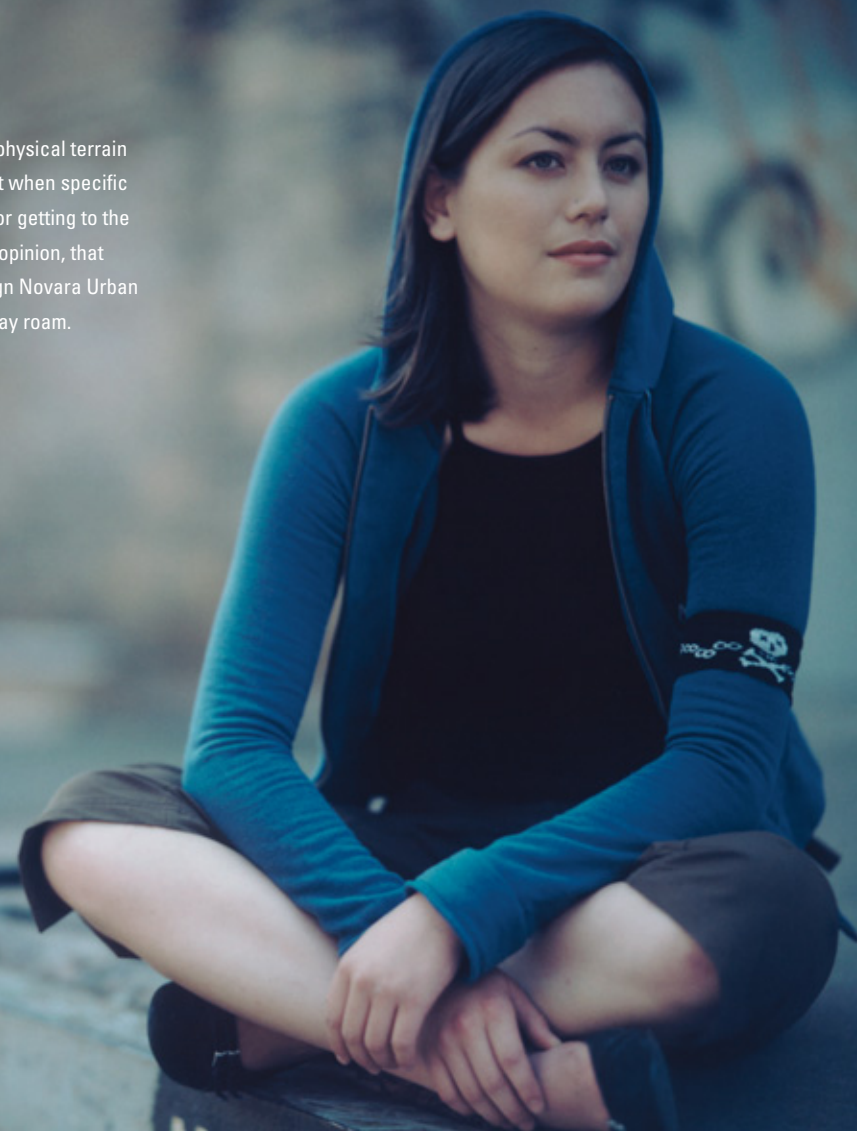

Our story of creating comfortable rides for women continues. We've engineered these mountain bikes with women-specific frame geometries and outfitted them with strategic component choices such as shorter cranks, shorter stems, women's saddles and even lighter tires.

You own this town

Cruise the home turf long enough and a funny thing happens. The physical terrain gets mapped right onto your psyche. You know you've hit that point when specific potholes become navigational waypoints. Or when your shortcut for getting to the Quicky Mart includes more back alleys than proper streets. In our opinion, that kind of familiarity breeds an incredible sense of freedom. We design Novara Urban bikes so they'll help you feel right at home in whichever city you may roam.

BUZZ®

Like a mountain bike built for concrete. Buzz is our quick-shifting, cab-dodging, pothole-rocking urban cowboy. Features a burly aluminum frame and an ensemble of street-smart components.

Frame: U6 aluminum **Fork:** Chromoly **Crankset:** Truvativ 5D 38/28 with alloy guard **Drivetrain:** SRAM 5.0 9-speed
Highlights: Hayes MX-4 disc brakes, Vittoria Randonneur 26x1.75 puncture-resistant tires, WTB Pure V-comp saddle.

SRAM WTB HAYES

Our urban bikes are tough and heavy on attitude.

Whatever your niche (messenger, commuter, thrasher, etc.), you'll find a Novara to serve as a symbol of your individuality and an expression of your personal freedom.

Morgan clips along in the ever-dapper Flip Capris.

BIG BUZZ

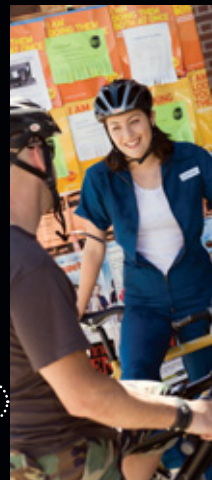

A lot like its cousin Buzz, only faster and built for longer ranges. Big wheels, 700c tires and a compact crankset let you transform any old stretch of pavement into your own personal Bonneville Speedway.

Frame: U6 aluminum **Fork:** Shaped alloy **Crankset:** Truvativ Elita 2.1 **Drivetrain:** SRAM X.7 9-speed **High-**
lights: Avid BB5 disc brakes, WTB Speed Disc rims,
Vittoria Randonneur 700x28 puncture-resistant tires.

SRAM

WTB

Avid

Big Buzz draws thrust from a Truvativ Elita compact crankset coupled with a mountain-bike style rear cassette. This lightweight setup offers a robust gear range, so you can crank hard no matter how sick the climb or depraved the descent.

FUSION

Our luxury commuter has all the best goodies such as weather-resistant roller brakes and hub-powered smart lights that know when it's dark. 700c tires help keep the pace lively.

Frame: 6061 aluminum **Fork:** Shaped alloy
Crankset: RPM City Single 46T with CNC alloy guard **Drivetrain:** Shimano Nexus 8-speed internal
Highlights: Dynamo hub-powered Shimano M300 front lights; fully accessorized with rack, fenders and lights; Vittoria Randonneur 700x32 puncture-resistant tires.

SHIMANO®

Vittoria
Randonneur

Let's clear the air

Imagine if we took all those cars and their emissions-pumping tailpipes off the road. Suddenly the world becomes quiet and virtually honkless. Smog clouds dissipate. The sun peeks out. Birds chirp. And transportation gets a human heart, with everyone traveling on next-gen commuter bikes like Fusion and Transfer. Check them out. A revolution is coming.

Let there be light—and no batteries required. Both our commuters have hub-powered smart lights that turn on when it's dark. Fusion's two-beam system has an all-day LED bulb and a xenon for low light.

TRANSFER

Ditch your car for good. Transfer's the low-maintenance, frighteningly easy alternative. Has no-fuss internal gearing and a hub-powered front light. Comes with fenders, rack and even a bell.

Frame: 6061 aluminum **Fork:** Shaped alloy **Crankset:** RPM City Single 38T with alloy guard
Drivetrain: Shimano Nexus 7-speed internal **Highlights:** Dynamo hub-powered front light, Vittoria Randonneur Cross 26x1.75 puncture-resistant tires, includes rack, fenders and lights.

SHIMANO®

Vittoria
Randonneur

More cowbell

If you've got a fever for the gladiator-style competition that's known as cyclocross racing, Novara offers the cure: Rivet and Element. They're both dialed for action and ready to plunge into the fray. Ring-a-ding-ding.

ELEMENT

With race-worthy geometry and components, Element's ready for the cowbells to ring. It's also rack- and fender-compatible, making it a sweet commuter option in even the most heinous weather.

Frame: AN6 aluminum cyclocross **Fork:** Alloy cross **Crankset:** FSA Gossamer MegaExo Compact 48/38
Drivetrain: Shimano Tiagra 9-speed **Highlights:** Avid BB7 disc brakes, Ritchey Aero Tour disc wheels, WTB CrossWolf tires.

RIVET

Our natural-born cyclocross racer revels in mud, rain and general bad craziness. It's got an AN6 aluminum frame, plus we've carbonated the fork, rear triangle and cranks for refreshing lightness.

Frame: AN6 aluminum with carbon rear stays **Fork:** Carbon Cross **Crankset:** FSA SL-K Carbon Cross Compact 48/38 **Drivetrain:** Shimano 105 9-speed **Highlights:** Ritchey Aero DS wheels, Ritchey Comp saddle.

Rack up the smiles

Start pedaling a Novara touring bike and the stress of the workaday world immediately begins receding on the horizon behind you. After a couple of days, you'll even start forgetting to look back over your shoulder to see how far you've gone. The adventure, after all, lies ahead.

RANDONEE

It may be upgraded with the latest tech, but it's still the original Novara at heart. A steel-framed road warrior with a wide range of gears. Ready to go wherever you want. For as long as you want.

Frame: Reynolds 520 double-butted chromoly **Fork:** Chromoly **Crankset:** Shimano Deore Touring **Drivetrain:** Shimano LX Tiagra 9-speed **Highlights:** Vittoria Randonneur 700x32 puncture-resistant tires, Mavic A319S rims, Ritchey BioMax handlebar.

REYNOLDS SHIMANO® RITCHEY fi'zi:k

SAFARI

A mountain bike that's beefed up for the long, long haul. Handles well under heavy loads, and it's practically indestructible. Suspension seatpost helps keep life on the road civil.

Frame: U6 aluminum **Fork:** Chromoly **Crankset:** Shimano Deore Touring **Drivetrain:** Shimano Deore LX 9-speed **Highlights:** Shimano disc brakes, Mavic XM317 rims, Trekking handlebar.

SIX SHIMANO® fi'zi:k

Set them free

For a child, a bike can offer that sweet first taste of true independence. We really love that fact. That's why we make sure every one of our kids' bikes provides the kind of high-quality ride that'll get your young'un psyched for a lifetime.

Our kids' lineup runs the gamut from tiny bikes tricked out with training wheels all the way up to Pulse, a road bike built with the same type of frame construction and branded components we use on our grown-up bikes.

PULSE

Aluminum frame and quality components make Pulse a totally legit road bike—it's just sized for kids. Now you and Junior can kick asphalt, family-style. Not afraid of getting dusted, are you?

Frame: 6061 aluminum **Crankset:** Shimano R2200 50/39 **Drivetrain:** Shimano Sora 8-speed
Highlights: Alex DA-16 26" rims, Tektro Oryx Canti brakes, Ritchey handlebar and stem.

		MINI BUZZ
		MOXIE
		TRACTOR

Honey, they shrunk the Buzz. And we did it so the kids could go big (safely). This steel-framed single-speed has powerful pull brakes and lots more sweet specs.

Frame: Hi-tensile steel **Fork:** BMX uni-crown **Crankset:** One-piece steel **Highlights:** Tough frame, Kenda Flame tires and jumpable geometry.

Our go-anywhere, do-anything girls’ bike. Suspension fork for comfort over washboard trails and pothole-peppered streets.

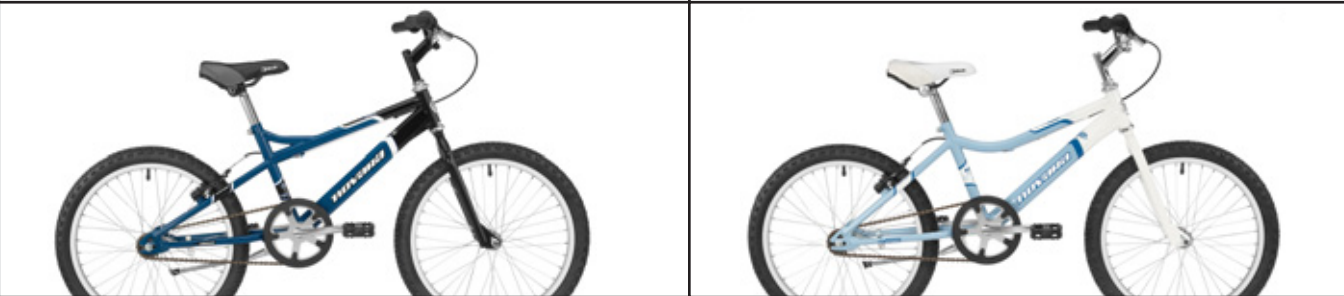

Frame: 6061 aluminum **Fork:** RST Capa 5 **Crankset:** One-piece steel **Drivetrain:** Shimano **Highlights:** Shimano components and a light, strong frame.

Set your little guy free. Suspension fork, 21-speed drivetrain and grippy tires offer big-time performance in a pint-sized package.

Frame: 6061 aluminum **Fork:** RST Capa 5 **Crankset:** Shimano TX70 **Drivetrain:** Shimano **Highlights:** Shimano components and a light, strong frame.

DUSTER 20" 6-SPEED

DUSTER 20" SS

Get him stoked for a lifetime of riding. Hi-tensile steel frame and quality components withstand all the tough love your kiddo can dole out. Available in single- or 6-speed versions.

PIXIE 20" 6-SPEED

PIXIE 20" SS

Sure, your girl's all sugar ‘n spice and whatnot *now*. But one ride on the steel-framed Pixie and she'll be ready to peel out and kick up some serious dust . Available in single- or 6-speed versions.

STINGER 16" & 12"

Start the young ripper rolling on this good-looking micro machine. It's got big-kid BMX styling in a scaled-down package—so you know he's gonna be all over it.

FIREFLY 16" & 12"

Our teensiest ride for girls. Coaster brakes make it easy for her to keep the speed under control. A handlebar-mounted bell lets her announce her presence with authority.

How to size your Novara bike

1. With shoes on, measure from your crotch to the floor. This gives you your inseam length.
2. Find the stand-over height (A) on the Novara geometry chart above.
3. For mountain, touring, urban and comfort bikes, the difference between your inseam length and the stand-over height should be around 2"; for road bikes, this difference should be around 1".
4. If you're between sizes, select a larger frame if you prefer a more comfortable upright riding style; select a smaller frame if you prefer a lower, more aerodynamic riding style.

- A. Stand-over height (see left)
- B. Seat tube, center-to-center
- C. Top tube
- D. Rear center
- E. Front center
- F. Wheelbase
- G. Offset
- H. Seat tube, center-to-top
- I. Head tube angle
- J. Seat tube angle

At Novara, we believe that if you follow your heart you can't help but end up in a good spot. That philosophy guides the way we design bikes and the way we do business.

As part of the REI family, we support many good-karma organizations around the country with bikes and gear, donations, financial grants and volunteering. We work at a national level, and we also get involved with grassroots programs through REI stores.

An example of a community organization we're currently working with is Workshop Houston, formerly Third Ward Community Bike Center. Their Earn-a-Bike program teaches kids hands-on skills as they rebuild broken-down bikes. When the kids finish, they give the bikes to charities. Afterward, they get to fix up a bike for themselves.

Our grant helped fund their new Kids' Mechanic Program which provides advanced training and volunteer opportunities for kids who complete the Earn-a-Bike program.

Workshop Houston has our supreme respect. They're helping youth, teaching them skills that they can use all their lives and addressing a need for transportation in a neighborhood where many residents can't afford cars.

Learn more about how we're giving back at novarabike.com.

Novara encourages you to ride frequently and fervently. We also encourage you to ride responsibly. That's why we endorse the "rules of the trail" formulated by IMBA, the International Mountain Bicycling Association. They're considered the standard code of conduct for mountain bikers and include key guidelines such as respecting trail closures, practicing low-impact cycling and leaving no trace. Learn more at www.imba.com.
