

We believe

good design makes a difference

We also believe that we have a responsibility to make the world a brighter place. We donate 1% of sales to environmental charities every year, and we make sure our shades last as long as possible with our Forever Warranty.

This summer we launched our first ever recycled plastic sunglasses collection. We've invented a way to turn scrap plastic into new sunglasses frames. Instead of going to a landfill, this recycled polycarbonate resin now gets a new life as part of your everyday adventures.

This new collection is just the beginning of our journey towards greater sustainability. Follow along as we work to make all of our sunglasses from 100% recycled materials by 2020 and strive to become a carbon neutral business.
